## McGrath Real Estate

### The Brief

Glenco has been working for McGrath Real Estate for over 20 years, we provide our services to their Property Managers to ensure that the assets they manage are provided with the best service every time.

McGrath also trust our team when it comes to their own office upgrades. Their existing air conditioning systems were failing, they required us to decommission the old units and replace with new systems.

# The Delivery

The Glenco team completed two large installation jobs for two offices, Leichhardt and Manly. Both jobs had different requirements, we provided one with a new ACTRON 24kw Advance Spilt Ducted System and the other with 5 new Temperzone Water Cooled Package units.

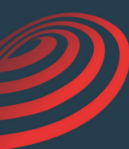

Crane lifts were also essential to have all the equipment removed and replaced with ease.

# The Outcome

The McGrath staff can now continue to work in a comfortable office environment all year round.

These new units will also be regularly maintained and serviced by our team to ensure they get the longevity these systems can provide.
