23	WHY GLENCO

est. 1988

A trade service company that offers
more than what you expect.

WE ARE

SERVICE

Human beings, that value human beings.

EXCELLENCE

People that don't believe in doing things by halves.

TEAM

All in this together.

UNSTOPPABLE

Ambitious about quality, service and building a future.

ABOUT GLENCO

Since being established in 1988 Glenco has grown from a small family run business, delivering forward thinking service in all types of electrical work into a large team of trade service providers across a multitude of fields.

Today at Glenco we specialise in Electrical, Level 2 ASP, Air Conditioning, Building & Maintenance (registered Class 2 building practitioners), Security & Alarms, Energy, Fire and Communications.

It is our desire to be more and do more than what is expected that gives us the opportunity to prosper and stand out. We believe in our team, our clients, the power of service and some honest to goodness hard work. It's this approach that builds a culture that offers more than what you'd expect of your trade service provider.

We believe quality lies outside the key practices of trade work and in the finer details of our internal practice, experience and personality.

SINCE 1988

INSIDE GLENCO

Glenco's track record of successfully delivering countless projects on time and on budget for our clients makes us stand out in our industry. We maintain a persistence to deliver projects effectively and go above and beyond the expectations of our customers. At Glenco, we have systems and procedures in place that are unique to a trade service business. We have developed

these carefully thought-out processes over our many decades in the industry. We work as a partner with your business to achieve the best possible outcome for your project, keeping all the moving parts of managing a large commercial installation or maintenance contract under control so you don't have to.

INSURANCE

Public Liability:	Liability Limit	\$20,000,000
Professional Indemnity:	Liability Limit	\$20,000,000
Motor Vehicle:	Liability Limit	Comprehensive
Worker's Compensation:	Liability Limit	Comprehensive

PEOPLE + CULTURE

At Glenco, our people provide the building blocks upon which the foundation of our company stands; customer service. It is our service professionals that we employ in house as well as our administrative and managerial team that keep the ball rolling and ensure we deliver time and again on our service promise. Our team of tradespeople

are highly skilled and continually developed to be the best in the industry. Because we know how much we rely on the motivation and stamina of our service delivery team, we ensure we provide ongoing training and development for the individuals that go out of their way to make your experience as a Glenco client one of a kind.

MANAGEMENT SYSTEMS

The key to successfully providing you with a level of service that is different to what you may experience from another trade provider is not only in our people, it is also in our systems and processes, from operational to WHS.

Having the right systems will help ensure the best possible outcomes for all parties involved, and hold our team and suppliers accountable for the service we all deliver.

VALUE ENGINEERING

For the benefit of all stakeholders, Glenco's knowledge and experience is valuable from the initial concept stage of a project, to the finished product. The value Glenco adds comes from our capability to 'think like the customer' and deliver your desired outcomes as a high quality business partner. From conceptualisation to completion, we have a long and successful track record delivering projects, including a number with design and construct requirements.

Glenco has the ability to manage preliminary challenges such as;

- Design recommendations
- Appropriate Specification Documentation
- Appropriate Equipment/Product Choices
- Equipment/product procurement
- Off Site Manufacturing
- Produce and Manage Project Logistics
- Commissioning Processes

Working together with all stakeholders, our experiences in managing our client's needs and complex processes allow us to reach the best possible outcomes.
